SUMMARY

Final-year Computer Science (Cloud Computing and Automation) student with hands-on experience building cloud-native software and production-grade AWS infrastructure. Strong foundation in Python, Java, Go, Kubernetes, Docker, Git and CI/CD, with experience developing backend services, debugging distributed systems, and building AI-powered cloud applications. Interested in software engineering, cloud-native systems, Linux, Kubernetes, and open-source technologies.

EDUCATION

Vellore Institute of Technology, Bhopal

2023 – 2027

B.Tech in Computer Science & Engineering (Cloud Computing and Automation)

CGPA: 8.3 / 10

TECHNICAL SKILLS AND CERTIFICATIONS

Cloud & DevOps: AWS, Docker, Kubernetes, Terraform, Ansible, Jenkins, GitHub Actions, Redis, Prometheus, Grafana, Linux, Bash, OpenShift, ARGO CD, OpenTelemetry

Languages: Python, Java, JavaScript/TypeScript, HTML5, CSS3, SQL, GO

Software Engineering: FastAPI, React, Git, REST APIs, PostgreSQL, Backend Development, Agile, Debugging, Django, Distributed Systems, Codex, Microservices, Generative AI, Pytorch

Certifications: AWS Certified Cloud Practitioner (2026) | OCI AI Foundations Associate (2025) | Docker Foundations Professional (2025)

EXPERIENCE

NEC Corporation India Pvt. Ltd.

Sep 2026 – Present

Trainee — Technical Presales (Cloud & Generative AI)

- Support technical solutioning and cloud architecture for **AWS cloud and Generative AI** enterprise use cases using **Amazon Bedrock**.
- Develop and evaluate **Generative AI proof-of-concepts** with Amazon Bedrock, collaborating with technical teams to translate customer requirements into scalable, cloud-based solutions.

PROJECTS

AI DevOps Copilot — AI-Powered Kubernetes SRE Platform

[GitHub]

- Developed an **AI-powered incident management platform** for Site Reliability Engineering (SRE) that detects Kubernetes failures, analyzes application logs and cluster events, and generates automated **root cause summaries**.
- Built using **FastAPI, Next.js, Docker, Kubernetes, Terraform (IaC), AWS EKS, and GitHub Actions (CI/CD)** for automated deployment and cloud-native operations.

MeetMind AI — AI-Powered Meeting Intelligence Platform

[GitHub]

- Built a **serverless AI platform on AWS** that processes meeting transcripts into summaries and insights using **Amazon Bedrock (Llama 3)**.
- Implemented an **event-driven architecture** using S3-triggered AWS Lambda for asynchronous processing, with pre-signed uploads for secure client interactions.

KubeForge — CI/CD Platform with Blue-Green Deployment

[GitHub]

- Built a **CI/CD platform on AWS EKS** provisioned using **Terraform (Infrastructure as Code)**, automating container build, testing, and Kubernetes deployment workflows.
- Implemented **Blue-Green deployments** and integrated **Prometheus and Grafana** for monitoring, metrics, and observability.

LEADERSHIP

President — Cloud Zone Club, VIT Bhopal

Aug 2025 – Present

- Lead **40+ members** and organized technical events for **200+ students**, increasing club engagement by **50%**.
